**Linear Water Molecule**

The water energized by the terahertz device has a higher and more stable energy, can neutralize free radicals, increase oxygen content, and restore the vitality of water. **Terahertz** device breaks the water particles into a linear form which allows it to be absorb directly into our body cells.

After you blow (I recommend from the top) the water for 5 minutes, you are good to go for 24 hours. Be sure to use glass to drink it. As far as taking it with you, we recommend buying **silicone wrapped water bottles** from Amazon or your local store. They work great and are safe from plastics contaminants!
